

ClinTrial Refer V2 development update!

Phase 1 cohort management

Phase I studies have limited numbers and tight timeframes. Screening potential participants to Phase I studies changes as cohort change. ClinTrial Refer V2 will house an exciting new feature specially catering to Phase I trials. You will be able to enter Status of cohorts—closed open and pending at sites. Sites can have a preview of what is to come and prepare in advance.

World Hospital Congress 2018

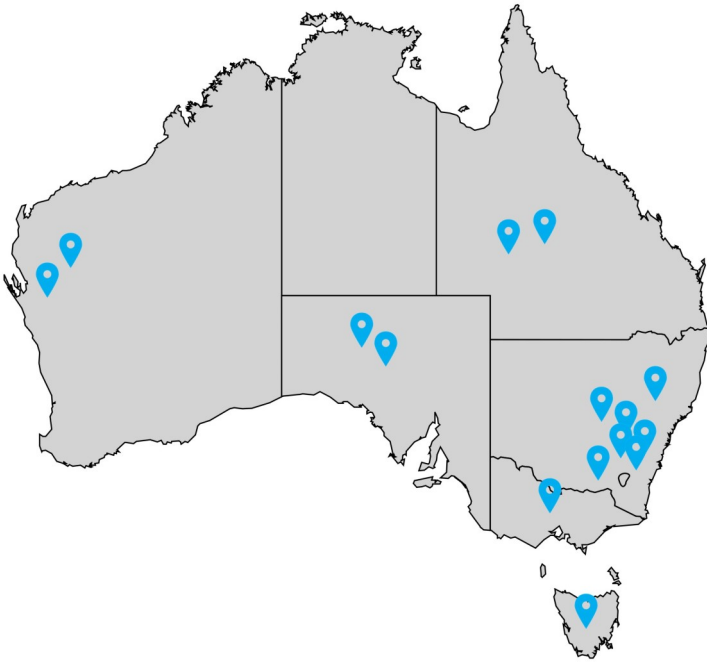

ClinTrial Refer was 1 of 11 innovations invited to present our innovation at the World Hospital Congress 2018. What a great event, many healthcare innovators and attended by leaders from around the world. It is excellent to see that Australia is thriving with new innovators in the field. Australia is competitive in the international scene and ClinTrial

We would like to thank Janssen for supporting the ClinTrial Refer V2 project. ClinTrial Refer is actively looking for support and partnership in our exciting project ahead of us. Please contact Roland rolland.suen@health.nsw.gov.au if you would like to show your support!

Did you know?

Not only does the ClinTrial Refer apps cover most of Australia for Haematology and Oncology. ClinTrial Refer covers over 800 sites globally!

ClinTrial Refer is a template for any Clinical Trial Portfolio. For information on this project, or how to license your own app contact:
