International Clinical Trials Day 20 May

International Clinical Trials Day is celebrated annually to commemorate the day James Lindt started his study to determine the cause of scurvy. He divided a group of sailors into two groups and provided different treatments to each group which allowed him to provide evidence of the link between citrus fruits and preventing scurvy. He is known as the pioneer of clinical trials.

International Clinical Trials day is celebrated annually around the world on 20 May to raise awareness of the important role of clinical trials in advancing medicine and healthcare. The team at ClinTrial Refer would like to take this opportunity to thank all the amazing humans that make clinical trials and ongoing advancements possible. These include, doctors, nurses, scientists and of course patients and healthy volunteers. So, on International Clinical Trials Day, if you know a clinical trial participant or anyone who works to create a healthier future for all of us, please take a moment to thank them!

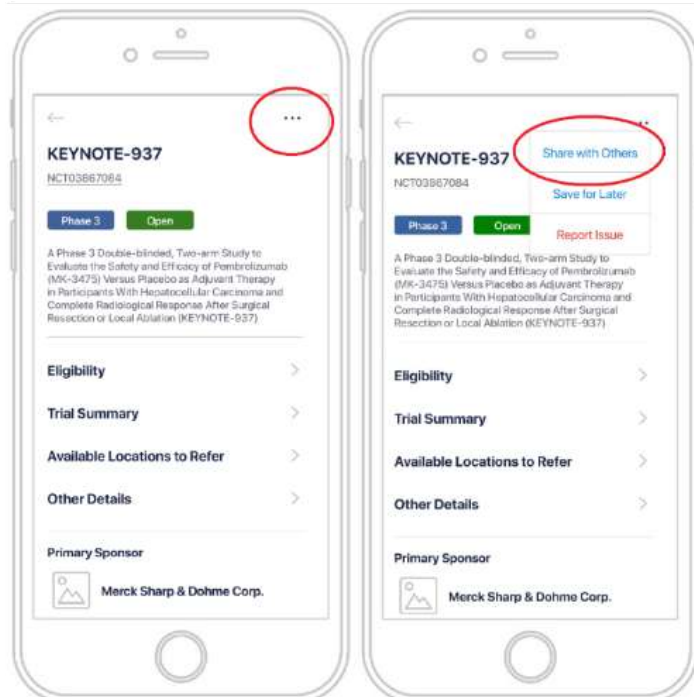

ClinTrial Refer is honored to play a role in supporting medical advances through the provision of improved access to current clinical trials. We continue to work passionately to create an ecosystem that offers greater transparency and equity of access to clinical trials that have the potential to change lives. We thank all our wonderful clients that share that commitment.

Thank you!

App Features - Sharing Trials

Did you know that the ClinTrial Refer App allows you to share trials with other users? Open the trial you would like to share and click the menu on the top right. Click 'Share with Others' and this will allow you to share the trial by email or other social media apps. Simple!

Mayo Clinic

The Australasian Ocular Melanoma Alliance (AOMA) is a MASC Trials priority research special interest group. The AOMA Summit will bring together healthcare professionals, researchers, and consumers in ocular melanoma to facilitate national and international collaborations for this rare and often devastating cancer.

The two-day in-person event includes a scientific program and presentations focused on consumer and advocate involvement. The event will cover diagnosis and clinical management, clinical trials and registries, laboratory and translational research, current and future treatment options, and consumer and clinician discussion panels.

Venue: In-person Peter MacCallum Cancer Centre, Melbourne
Register to attend [here](#).

Trial Spotlight- New Trial Listings

Did you know that ClinTrial Refer has over 1800+ trials listed in the database in over 700+ locations and more than 129 health conditions?

This month alone we have listed studies for the following health conditions:
